

I chose satellite radio (XM) because it offers more choices and better quality than local radio. This is the same reason that I chose satellite TV over local cable. I pay a monthly fee to these providers for the programming that I want to hear and see. The NAB have no right to take away services or interfere with what type of programming I can receive. Reject petition 04-160 and let us all have the freedom to chose what radio programs we want to hear.
